Dr Perry A Chapdelaine, Sr  
The Rheumatoid Disease Foundation  
Rt 4, Box 137  
FRANKLIN  
TN 37064  
United States of America

Dear Perry,

My friend, Edgar W Angel of T.A.K., P O Box 1245, Canton, 30114, Georgia, has now asked me to produce some sort of medical write-up for his new treatment of swimming pool water by means of copper. I have therefore produced the enclosed testimonial which I hope you and other members of the Foundation are in agreement with what I have written. If you approve of it, perhaps you will get it typed out on to Rheumatoid Disease Foundation paper and forward it to Edgar Angel for his use.

I do feel that Edgar is doing a good job here, not only his copper highly secured chlorine but is very much cheaper by the method which he is using. I have seen this being used over here and it is extremely effective and it would be nice to help these people so as to cut down the amount of rheumatoid arthritis which is so prevalent.

If it is necessary, please discuss this matter with anybody else you think. The main point is, I would like to get it off as soon as possible to him so that they can get going. I think they may still have to undergo FDA testing but of this I am not sure.
